

EQUIPMENT OPERATOR

Georgetown, Guyana

About Us

We are Schlumberger, the leading provider of technology and services to the energy industry. Throughout much of the oil and gas lifecycle in over 120 countries; we design, develop, and deliver technology and services that transforms how work is done.

We define the boundaries of the industry by unleashing our talented people's energy. We're looking for innovators to join our diverse community of colleagues and develop new solutions and push the limits of what's possible. If you share our passion for discovery and want to find out what you could really do, then here is the place to do it.

Job Summary:

The Wireline Equipment Operator is responsible for delivering safe, efficient, and reliable product and service delivery to customers. The Equipment Operator identifies opportunities to improve service delivery, and assists field and maintenance crews with preparing equipment for operations.

Under direct supervision, the Wireline Operator will be responsible for safely performing Wireline related duties at the well site and in the shop while ensuring compliance with all regulations applicable to Wireline explosives operations.

Employee assists in rig up and rig down of equipment. Rebuild tools used in the servicing of the well. Maintain a clean shop and work area. Utilizes competency Processes to enhance job performance.

Relationships:

Reports to the Product and Service Delivery Manager.

Responsibilities:

Candidate's duties may include the following:

- Learn basic oil well operations including identifying different rig types and drill string components, BOP procedures and equipment, HSE procedures and guidelines, and other safety and service protocols and guidelines under the direct supervision
- Prepare for jobs by assisting with tool maintenance, pre-job and post-job tool checkout
- Assist rigging up and down the wireline surface and downhole equipment
- Assist in tool string make-ups and assembly of downhole logging tools including perforating guns, pipe recovery, and setting tools
- Assist with maintaining, cleaning, and performing preventative maintenance on down-hole and surface logging equipment inclusive of: mechanical devices, logging head, explosive setting tools and perforating hardware, cement bailer systems, pressure control components
- Performing basic duties at the well site and at the shop
- Actively participate in continuous improvement initiatives to promote safe and efficient operations
- Promoting and maintaining good customer relations
- Communicate with co-workers, superiors, company men, and rig supervisors on the well site
- Perform other related or site-specific duties as required
- Ensure job deliverables are accurate and delivered on time.
- Participate in pre-job and Toolbox meetings with crew members.
- Maintain good, safe working order of equipment according to standards, reporting problems or deviations.
- Ensure individual and crew work safety.
- Prepare equipment for rig up and rig down times.
- Operate the equipment according to competency level and job requirement.
- Wear PPE and observe HSE policies.
- Maintain the required safety training.
- Other duties and special projects as assigned.

Schlumberger is an equal employment opportunity employer. Qualified applicants are considered without regard to race, color, religion, sex, national origin, age, disability, status as a protected veteran or other characteristics protected by law.

Minimum Qualifications and Requirements:

- Technician Diploma or Associate's Degree in Engineering or similar field ideal
- Minimum of 6 months of previous experience as a wireline operator
- Strong mechanical aptitude
- Basic computer skills with knowledge of Microsoft Office
- Must be able to work in a team environment
- Must be able to perform the essential functions in a fast-paced and high-stress environment
