

Join Us At MODEC

MODEC is an Oil & Gas Japanese Company that has been a leading provider of solutions to the floating offshore oil & gas market for more than 50 years. With a fleet of 19 units operated by the company and nearly 50 projects delivered worldwide, we have the mission of producing oil and gas steadily and safely, 24 hours a day, 365 days a year. Our presence in 15 countries and the integration of our teams around the world give MODEC the opportunity to develop and share a high level of skills. Come join us! #bemodec

About us

Job Title: Combined Cycle Specialist

Department Name: Technical Management

Location: Georgetown, Guyana

Full / Part Time: Full time

Regular / Temporary: Regular

Job description

- Support MOG's corporate annual budget planning for Combined Cycle discipline.
- Contribute to continuous improvement of IMS by updating project status and monitoring IMS Documents.
- Develop and execute maintenance plans and inspections, monitoring KPIs, and developing action plans to ensure compliance with regulations.
- Ensure adherence to maintenance policy and reliability engineering.
- Contribute to operation reliability and performance by monitoring results, performing root cause assessments, and providing technical recommendations.
- Develop technical recommendations or action plans to meet operations' needs and feedback from technical management, fleet maintenance support, and operations areas.
- Contribute to CMMS governance by updating and monitoring information on hierarchy, job descriptions, and maintenance plans.
- Monitor process safety barriers' KPIs and provide technical recommendations.
- Support MOG's BID/EPCI process by providing technical and O&M cost reviews through the bidding and pre-ops teams.
- Participate in risk analysis workshops and safety reviews
- Safeguard MODEC from noncompliance by performing internal audits to meet international regulations, MODEC policies, and standards.
- Improve Combined Cycle Power Generation and Steam System availability and reduce costs.
- Provide technical support to pre-ops team on vessel equipment criticality assessment and maintenance plans development.

Responsibilities

Requirements

- Perform sporadic embarkations on vessels as required.
- CREA is required.
- Engineering Degree
- A minimum of 1-2 years in a similar field.
