### Features & Benefits

- **Thermal Guard® Energy Saving/Heat Retention System:** Fully insulated wash cabinet and roof, double wall construction, and pressure controlled vent damper with coalescer keep the heat and cleaning solution in and the energy bills down.
- **Solution Saver®/Oil Eater®:** Full flow 100% filtration using industry standardized filters and the OIL EATER® keeps your solution cleaner longer. Minimizing particulate and oil build up makes for cleaner parts and lower operating costs.
- **Easy Rack® Fixturing System:** The Easy Rack® provides almost unlimited part loading combinations. Easily field adaptable for individual needs. Multiple turntables and baskets are available.
- **Precision Targeting Spray System:** Four sided, 360 degree coverage with up and down aiming jets on slightly different planes to target your parts, not each other. Combined with the JETPORT®, provides spray coverage throughout the wash area.
- **Industry Standardized Components.** Most parts are available from major industrial supply houses. You are not held hostage by the high mark up on "captive" parts only available by the original equipment manufacturer.
- **One Year Warranty on Parts & Workmanship**
