

## Position Title: Health, Safety and Environmental Specialist

### About Us:

We are a leading technology provider to the traditional and new energies industry; delivering fully integrated projects, products, and services. With our proprietary technologies and comprehensive solutions, we are transforming our clients' project economics, helping them unlock new possibilities to develop energy resources while reducing carbon intensity and supporting their energy transition ambitions.

### Description:

This position plays a critical role in promoting a positive safety culture as well as developing, implementing and administering effective health, safety and environmental programs at the facility.

### Responsibilities:

- Promoting and supporting an HSE culture from within by leading the implementation of core HSE programs, policies, and initiatives
- Leads HSE incident investigations and reports, as needed; assist with case management and/or following up on occupational injuries/illnesses
- Advises on a range of specialist areas, e.g. fire regulations, hazardous substances, noise, safeguarding machinery, environmental and occupational diseases
- Implements changes to working practices that reduce risk and comply with legislation
- Coaches with respect to JSAs, at-risk activities, unsafe conditions, and safety improvement opportunities
- Ensures regulatory compliance - compliance with Local and Corporate requirements relating to training, recordkeeping, permits, reports, policy and procedures and other related compliance issues
- Creates and modifies HSE policies, processes, and procedures

### Requirements:

- Vocational/Technical certificate, University degree or equivalent experience preferred.
- In depth knowledge of Local HSE regulations, i.e. OSHA , BSEE, SEMS, TCEQ, EPA etc.
- Ability to develop and implement HSE policies and procedures
- Advanced analytical and problem-solving skills related to functional areas and understanding impact to the overall business
- Understands and efficiently uses basic computer hardware and software to perform tasks.
- Requires proficient knowledge of one or more of the functional HSE programs: Lockout/Tagout; Management of Change; Incident Investigation and Reporting; Root Cause Analysis; Facilities and Equipment HSE Audit; Risk Assessment or Hazard Operability (HAZID/HAZOP); Job Safety Analysis
