

**WE ENGINEER.  
WE MACHINE.  
WE DELIVER.**

From precision machining to complex fabrication, we deliver reliable solutions that keep industry moving.

## CAREER OPPORTUNITY

# OPERATIONS SUPERVISOR

PND Machining Inc. is seeking a results-driven Operations Supervisor to oversee daily execution across machining, fabrication, and industrial projects. The ideal candidate will have a strong background in supervising teams, project controls, material and subcontractor management, and a commitment to safety, quality, and on-time delivery.

**PRECISION**  
In every detail

**RELIABILITY**  
In every commitment

**INNOVATION**  
In every solution

## KEY RESPONSIBILITIES

- Supervise and coordinate daily activities of fabrication, machining, and field execution teams.
- Ensure safe, efficient, and timely execution of projects in accordance with drawings, specifications, and schedules.
- Monitor project progress and implement effective project controls to meet milestones and quality standards.
- Manage materials and inventory to support uninterrupted project execution.
- Coordinate and manage subcontractors to ensure quality, safety, and timely performance.
- Review shop drawings, work instructions, and method statements for compliance.
- Ensure adherence to HSE, quality standards, and company procedures.
- Report on project status, resource utilization, and potential risks to senior management.
- Must be willing to work flexible hours to meet project demands and deadlines.

## REQUIREMENTS

- Diploma in Mechanical Engineering (minimum).
- Minimum of 3 years' experience in operations or project supervision within machining, fabrication, or industrial environments.
- Strong knowledge of fabrication processes and welding methods (SMAW, GTAW, GMAW).
- Proven experience in managing execution teams, materials, and subcontractors.
- Solid understanding of project controls, scheduling, and reporting.
- Ability to read and interpret technical drawings and specifications.
- Strong problem-solving, leadership, and communication skills.

## ASSETS

- Experience in machining operations will be an asset.
- Familiarity with ISO standards and quality management systems.
- Experience with Tier One contractor pre-qualification processes and requirements.
