

Position Title: Quality Inspector

About Us:

We are a leading technology provider to the traditional and new energies industry; delivering fully integrated projects, products, and services. With our proprietary technologies and comprehensive solutions, we are transforming our clients' project economics, helping them unlock new possibilities to develop energy resources while reducing carbon intensity and supporting their energy transition ambitions.

Description:

This position is a solid independent contributor able to completely work independently on the assignments involving more varied and complex issues with limited supervision.

Responsibilities:

- Administrates the primary Quality activities, which would include understanding, promoting, and implementing Safety, Quality, Delivery, and Cost in order to achieve the objectives to create customer success.
- This position will include planning, scheduling, purchasing, communication, office management, and any other inspection activities that may be required.
- Ability to do the work and effectively teach other employees.
- Develops inspection, test plans and quality plans.
- Performs root cause analysis
- Drives corrective and preventive action plans.
- Supports ongoing projects, international sites, and Quality Assurance and continuous improvement activities.
- Manages documents and procedure development

Requirements:

- A High School diploma or equivalent.
- Typically 2+ years of quality experience in a manufacturing and services environment.
- Ability to represent the TechnipFMC quality culture, absolutes, and an understanding of nondestructive testing.
- Technical and interpersonal communication skills.
- Ability to professionally handle project issues as they arise, eliminating downtime
