

## SUSTAINABILITY, ENERGY CONSULTANT

### RESPONSIBLE:

- Undertaking a range of environmental assessments using third-party assessment methodologies such as BREEAM, LEED, and WELL
- Developing a sustainability strategy from scratch, from setting vision statements to performing materiality reviews
- Conducting BREEAM Pre-Assessment and providing design advice
- Understanding of clients' sustainability impacts and carbon footprints, to advise on developing and delivering on ambitious carbon reduction and broader sustainability targets
- Helping clients in the delivery of projects from compliance, setting targets to delivering on ambitious goals such as Net Positive or Science-Based Targets
- Being able to challenge, through providing insights, future trends, and articulating the value of sustainability to businesses, with an understanding of future value creation
- Managing analysts' workload to meet project deadlines
- Producing reports and providing advice and guidance to clients and project teams
- Arranging and attending meetings, taking minutes, and distributing actions; and
- Assisting with pitches and tenders.

### EXPERIENCE/QUALIFICATION

#### EXPERIENCE

- Minimum three years of related experience
- Strong analytical skills, with an ability to manage and interpret data to inform effective decision making
- Proven project management experience and excellent communication skills
- Attention to detail and accuracy, in written, visual, and numeric work
- The ability to manage multiple ongoing assignments simultaneously
- Ability to work as part of a team and on own initiative
- Ability to produce structured, concise, and meaningful reports, summarizing results and justifying conclusions, containing very technical information; and
- The willingness to learn and take a leadership role in the future.

#### QUALIFICATION

- The candidate should possess a **Masters' degree in Environmental Science** or a Degree in Environmental Science with 5 or more years of working experience in the discipline of environmental science or a related field
- Knowledge of BREEAM, DGNB, and/or LEED will be a plus
- Working experience in the Oil & Gas industry will also be a plus.

To apply, please send your CV and cover letter to [jobs@greenstateoilandgas.com](mailto:jobs@greenstateoilandgas.com) with a mention of the role in the subject line.

Only candidates whose qualifications, experience/skills closely match the requirements will be contacted, **on or before July 16, 2021.**
