

## VACANCY: Technical Maintenance Manager

**Description:** The Technical Maintenance Manager will be responsible for managing and supervising electrical and other technical personnel assigned to maintenance of the facilities.

**Job Type:** Long Term Role with a 9 hours schedule, 5 days work week.

### Qualifications:

The role of the Technical Maintenance Manager requires

- Must be a Master Electrician and Electrical Engineer.
- Must have a valid electrical license (all class).
- Comprehensive knowledge of and how to implement the National Electric Code (NEC).
- Experienced with aspects of project management such as coordinating, budgeting and planning.
- Must be computer literate including but not limited to MS Word and Excel.
- Minimum of 10 years of proven experience with references.

### Duties:

The selected candidate will perform duties such as:

- Ensure systems are operating at optimal capacity and in a safe manner.
- Develop and implement maintenance policies and procedures per system manufacturer's and international standards.
- Create electrical plans and bills of quantities and provide installation for projects.
- Provide quality control inspections as per NEC and other applicable codes.
- Manage electricians and other assigned technical personnel.

### Remuneration

Compensation will be based on academic qualification and experience.

### Instructions to apply:
