

TechnipFMC

Position Title: Workshop Lead

About Us:

We are a leading technology provider to the traditional and new energies industry; delivering fully integrated projects, products, and services. With our proprietary technologies and comprehensive solutions, we are transforming our clients' project economics, helping them unlock new possibilities to develop energy resources while reducing carbon intensity and supporting their energy transition ambitions.

Description:

This position is a solid independent contributor able to complete work independently without direct supervision. Individuals in the role are able to solve complex issues and make modifications as needed. It is necessary for someone in this role to effectively teach and transfer subject matter to others. This position uses extensive assembly experience, advanced skills and judgment to complete any assigned assembly projects.

Responsibilities:

- Interfaces with all functional areas involved with Assembly to troubleshoot, communicate and resolve issues. Serves as a resource to others in the resolution of complex problems and issues. Direct interface with Customer Representative.
- Works under minimal supervision. Relies on experience, judgment and advanced skills to plan and accomplish assigned goals. Resolves questions and problems in mastered sub-assemblies. Refers only the most complex issues to higher levels.
- May assist in orienting, training, assigning and checking the work of less experienced employees.
- Oversees distribution of work load across the workforce whether it be service orders, load outs, sales order deliveries, receiving in components, etc.
- Ensures that we achieve 100% OTD, meet all agreed upon customer (internal and external) demands and at a Zero defects.
- Reviews team requirements daily, coordinates activities and plans and coordinates overtime requirements. Ensures that labor reporting is accurate and balances with time sheets. Monitors performance, quality, safety and housekeeping and reports to Supervisor.

Requirements:

- High school diploma or equivalent required.
- Technical School certificate or National Diploma required.
- Generally 2+ years of experience in field.
- Previous experience in Subsea Drilling System required
