Our ambition is to build a sustainable future through relentless innovation and global collaboration – and we want you to be part of it. You'll be joining a culture that values curiosity, expertise, and ideas as well as diversity, inclusion, and authenticity. Bring your unique energy to our team of more than 20,000 people worldwide, and discover a rewarding, fulfilling, and varied career that you can take in anywhere you want to go.

### Description:

A Subsea Services Installation Engineer is responsible for installation and intervention operations executed by TechnipFMC personnel in field environments. Provides onsite and remote technical support for one or more disciplines in the subsea drilling, completion, topside controls and tie-in operations executed by TechnipFMC at various Field Locations (onshore and offshore) for Guyana Projects.

### Responsibilities:

- Coordinates logistics and management of equipment, tools, and spares.
- Develops and maintains accuracy of project installation procedures and equipment lists
- Provides technical support in the field and office environment and input into RCA's and field non-conformances.
- Respond to technical requests with direct customer interface.
- Provide planned and unplanned technical support and troubleshooting for onshore and offshore activities
- Coordinates engineering resource requirements with Field Service Manager.

### Requirements:

- BS degree in Engineering required.
- 2- 4 years of experience in the O&G industry, field experience is required.
- Solid analytical and problem solving skills.
- Interest and ability to perform hands-on labor in a field environment during operational execution.
- Possess strong PC skills and knowledge of word processing, spreadsheet and presentation software.
- Must be able to complete T-HUET/BOSIET training and all other relevant offshore training.
