

Position Title: Master Planner-Scheduler

About Us:

We are a leading technology provider to the traditional and new energies industry; delivering fully integrated projects, products, and services. With our proprietary technologies and comprehensive solutions, we are transforming our clients' project economics, helping them unlock new possibilities to develop energy resources while reducing carbon intensity and supporting their energy transition ambitions.

Description:

The Workshop Master Scheduler is responsible for all aspects of traditional master production scheduling for operations (maintenance, mobilization, SRT and refurbishment services) within the Guyana onshore base operations. The role requires high attention to detail and thorough knowledge in all levels of manufacturing planning and shop operations workflow.

Responsibilities:

- Help develop and support a long horizon forecasting process for the workshop demand.
- Provide support to annual conversion of business unit strategic plans into long-horizon workshop operations and capacity plan, including data-driven recommendations for changes in specific capacity and capability based thereon.
- Maintain the integrity of the Master Production Schedule against standard capacity, ensuring achievable, agreed completion dates (BFDs) based on dynamic shop capacity.
- Reviews all contractual documentation regarding project planning and scheduling.
- Works with shop management and manufacturing engineering to establish capacity profiles in SAP and general capacity plans.
- Develops and leads all collaborative meetings and processes required

Requirements:

- Bachelor's degree in Business, Engineering, Procurement, Operations, or related field is required - or relevant equivalent job experience and education. Technical background required.
- At least 5 years of experience in manufacturing/production (or project) scheduling, production/project planning, operations, and supply chain with advanced SAP skills.
- Strong, demonstrated capability and understanding of manufacturing/production planning and control, MRP, MRP II, MPS, and ideally production activity control / execution & control of operations.
- Working knowledge of Primavera P6 or MS Project.
