

Saipem, has a vacancy for a Certified Welding Inspector

OBJECTIVE:

Support the implementation of the approved Saipem inspection and test plans, within the project and act as focal point for quality control related matters within the project and in liaison with external entities, as assigned.

RESPONSIBILITIES AND DUTIES:

- In accordance with SAIPEM approved Inspection and Test Plans, execute the specific inspections (Welding, NDT, Material) on materials, equipment and construction/installation activities on site issuing the relevant Quality Records
- Monitor and verify welding parameters and consumables during operations
- Knowledge of welding procedures and qualification
- Ability to check welders' qualifications (including laboratory tests examination)
- Knowledge to check the availability and suitability of the welding equipment consumables, pre-heating, welding, heat treatment, bevels, the extent of the repairs made by the various welders (taking any corrective action required)
- Ensure that all welding, heat treatment and any hardness testing are following the relevant codes and specifications
- Monitor pipes / material line up checks, ensuring that all installed pipe/fittings/material are compliant to the correct specification and that the material is in accordance with the specified material traceability requirements
- Carry out visual inspections and issues relevant daily reports
- Ability to check that material and equipment are correctly received, stored, preserved, and handled and are correctly identified and traceable versus material certificates
- Carry out the visual checks on the materials delivered to the operating site, verifying the integrity of the supply and the correct marking of the items
- Verify that the SAIPEM NCR management process is in place and effective
- Monitor the correct storage and certification of inspection instrumentation, calibration certificates
- Orderly collect and manage/check documents certifying tests, controls, and inspections documents, ensuring that all work-related records are properly retrievable within the final As Built dossier
- Ensure the correct implementation of the approved SAIPEM Inspection Test Plans, witnessing inspection and collecting relevant Quality Control records
- Full compliance with SAIPEM safety rules and requirement – authority to stop the work in case of unsafe working condition

EXPERIENCE AND SKILLS:

- 5 years of quality welding inspection.

- Quality Inspection background with an emphasis in welding, NDT, and material activities. Ability to interpret engineering specifications, NDT procedures, drawings, and codes/standards is required. Must be able to demonstrate the proper use of various measuring and testing instruments.

EDUCATION:

- Technical Diploma
