

Position Title: Workshop Engineer

About Us:

We are a leading technology provider to the traditional and new energies industry; delivering fully integrated projects, products, and services. With our proprietary technologies and comprehensive solutions, we are transforming our clients' project economics, helping them unlock new possibilities to develop energy resources while reducing carbon intensity and supporting their energy transition ambitions.

Description:

This position is a critical player in ensuring proper planning and execution of post-manufacturing services to our customers.

Responsibilities:

- Analyzes and interprets data independently. Anticipates potential problems and takes preventative action.
- Approves work instructions and engineering documentation to mobilize, refurbish, upgrade/convert, maintain, and preserve equipment.
- Supports Field non-conformance investigations, RCAs, and SN resolution.
- Consults with other departments on equipment designs and questions. Identifies root cause of problems. Develops alternative solutions and communicates associated benefits and risks.
- Participates in product and task standardization projects.
- Shares opinions, ideas and resources with others to achieve common goals; fosters teamwork and collaboration, builds trust.
- Interprets, applies and trains others on relevant policies & procedures.
- Ability to independently establish work tasks in order to successfully meet expectations.

Requirements:

- Guyanese National
- BSc. in Engineering: minimum 1 year experience
- Capable of producing standard technical product documentation
- Capable of solving technical issues
- Knowledgeable in how changes influence system engineering cost
- Knowledgeable of industry standards and quality requirements
- Capable of leading internal meetings
